“

Rise in demand for processed meat has increased the demand for additives in the animal nutrition and feed industry, which, in turn, has driven the market growth.”

Allied Market Research

Feed additives are food supplements used for farm animals, which include vitamins, amino acids, fatty acids, and minerals. There is an increase in the adoption of safe and affordable feed additives with the rise in the global demand for meat and poultry products in the end-use sectors. In addition, feed additives gain traction in the pet food segment, as the trend of pet humanization promotes health and well-being of pets.

Leading market players-

The key market players analyzed in the global animal feed

additives market include Cargill, Inc., BASF SE, Evonik Indus tries AG, Nutreco N.V., Archer Daniels Midland Company, Phibro Animal Health Corporation, Addcon Group, Aliphos Belgium S.A., Kemin Industries Inc., and Koninklijke DSM N.V. They have incorporated a number of strategies including partnership, expansion, collaboration, joint ventures, and others to heighten their stand in the industry.

The amino acids segment to lead the trail by 2025-

Based on additive type, the amino acids segment contributed to one-fourth of the total market revenue in 2017 and is expected to rule the roost throughout the estimated period. The feed acidifiers segment, on the other hand, is expected to grow at the fastest CAGR of 7.1% throughout 2018–2025.

The poultry segment to dominate during the study period-

Based on livestock, the poultry segment accounted for nearly half of the total market share in 2017 and is predicted to maintain its dominance during 2018–2025. At the same time, the aquatic animals would cite the fastest CAGR of 6.6% by 2025.
