Treadmill is widely used for physical fitness equipment for weight management and improving body stamina & muscular strength. Mostly used treadmills are motorized or electronic, owing to advance features offered to users. Rise in awareness regarding health & fitness, increase in obese population, government initiatives to promote healthy lifestyle, and increase in youth population are the major factors that drive growth of the global treadmill market. However, high price of treadmill is a key restraining factor of the market. On the contrary, surge in youth population, improved lifestyle, and rise in disposable income of individuals in developing countries are anticipated to offer immense opportunities for the market players.

An alarming rise in global obesity, especially in urban areas supplements growth of the treadmill industry. According to the WHO, there has been a startling increase in number of obese people worldwide. In past few years, around 39% of adults aged 18 years and above were overweight and 13% were obese globally. Obesity is associated with a number of health issues or disorders such as sudden cardiac arrest, hypertension, hypotension, and diabetes. Therefore, to lose weight, reduce stress, and improve blood circulation, obese people tend to use fitness

equipment including treadmills, thereby increasing sales of these products.

The outbreak of coronavirus has positively impacted the treadmill industry along with all stages of supply chain and value chain. Owing to the COVID-19 outbreak, consumers have become more concerned about their overall health & wellness. This is attributed to the fact that they have acknowledged that COVID-19 is impacting their mental & physical well-being. This, in turn, is propelling the demand for fitness equipment like treadmill at home, which is anticipated to boost the growth of the global treadmill market.

Furthermore, by distribution channel, the online store segment is anticipated to be the fastest growing segment, in terms of value sales during the forecast period. This is attributed to the fact that platforms or e-commerce are becoming a popular medium for purchase of sporting goods including treadmill among customers. This is attributed to easy availability of treadmills and benefits provided by it such as information about product functional attribute, time-saving features, and facility of home delivery to customers.

The global treadmill market segments are categorized into product type, end use, distribution channel, and region. By product type, it is classified into manual and electronic. By end use, it is divided into residential, institutional, and commercial. On the basis of distribution channel, the market is segregated into specialty store, franchise store, online store, and others. Region wise, the market is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, France, the UK, Italy, Spain, Russia and rest of Europe), Asia-Pacific (China, India, Australia & New Zealand, Japan, South Korea, ASEAN, and rest of Asia-Pacific), and LAMEA (Brazil, Saudi Arabia, South Africa, Turkey and Rest of LAMEA).

Key findings of the study:

By product type, the electronic segment accounted for the highest treadmill market share in 2020, growing at a CAGR of 5.6% from 2020 to 2027.

By end use, the commercial segment accounted for the highest treadmill market share in 2019, growing at a CAGR of 6.1% from 2020 to 2027.

By distribution channel, the specialty segment accounted for the highest market share in 2020, growing at a CAGR of 4.1% from 2020 to 2027.

By Region, North America occupied the maximum share in the market in 2020 and is expected to be the dominating segment during the treadmill market forecast period.
