

# Behavidence, a Pioneer in Digital Phenotyping, Nominated for Best Digital Health Solution in Prix Galien USA

*Behavidence, the leading digital phenotyping innovator for mental health, earns a Prix Galien USA nomination, recognized for pioneering data-driven solutions.*

NEW YORK, NY, USA, July 27, 2023 /EINPresswire.com/ -- [Behavidence](#), the forefront innovator in digital phenotyping for mental health, is proud to announce its prestigious nomination for the highly esteemed Prix Galien USA, often referred to as the Nobel Prize of Medicine. This recognition underscores Behavidence's unwavering commitment to revolutionizing mental health care through cutting-edge technology and data-driven solutions.

Prix Galien USA, the most distinguished accolade in the field of healthcare innovation, annually honors groundbreaking advancements in pharmaceuticals, biotechnology, and digital health solutions. Being shortlisted for the Best Digital Health Solution category signifies Behavidence's exceptional contribution in harnessing the power of technology to improve mental health outcomes and patient well-being.

Behavidence Logo

Digital phenotyping is an emerging field that leverages various digital data sources, such as smartphone usage patterns, social media interactions, and wearable devices, to monitor and analyze individuals' mental health states non-invasively and in real-time. Behavidence's proprietary platform employs cutting-edge artificial intelligence algorithms to transform this vast trove of digital data into actionable insights for mental health professionals, enabling them to deliver personalized and timely interventions.

Behavidence Founders: Dr. Girish Srinivasan, Dr. Janine Ellenberger and Roy Cohen

"We are deeply honored and excited to be nominated for the prestigious Prix Galien USA in recognition of our groundbreaking work in digital phenotyping for mental health," said [Roy](#)
