The list includes many political activists, journalists, medical practitioners, and most importantly, individual asbestos warriors who keep our movement going. We are enormously grateful for their tireless work, dedication, and self-sacrifice. In unity, there is power and hope.”

This year’s academic conference features many experts from around the world. Year after year, it is the only annual conference dedicated solely to preventing asbestos exposure and eliminating asbestos-caused diseases. Attendees have a unique opportunity to connect with the leaders and influencers in the asbestos prevention community, as well as victims and family members sharing in the fight against asbestos—turning frustration and sadness into action.
