Since the outbreak of COVID-19, the world economy continues to suffer from many destructive risks, many companies have experienced bankruptcy and a reduction in exchange rates. After more than two years of the epidemic, the world economy has begun to recover, entering 2023, the invasion of Ukraine by the Russian Federation and its global impact on commodity markets, supply chains, prices and The financial situation has led to the decline of international. taste. In particular, the war in Ukraine is causing prices to rise and disruptions in the energy market, working better for energy exporters than being pushed head-to-head to work and many other economies. The invasion of Ukraine has also caused the price of agricultural products to increase, which increases food insecurity and extreme poverty in many emerging and developing countries.
