Market Analysis and Insights: Global Payment Processing Market

Payment processing is how businesses complete credit card and debit card transactions. Payment processing services expedite card transactions, and payment gateways securely transmit data so money from a customer's issuing bank can be transferred to a merchant's account. All of this happens in seconds.

In the simplest terms, a payment processor is a company that handles transactions between two parties, such as a merchant and a customer. It accomplishes the payment by relaying the payment information, like a credit card, from the customer to the merchant's preferred bank account.

The global Payment Processing market size is projected to reach US\$ 248930 million by 2028, from US\$ 90880 million in 2021, at a CAGR of 14.5% during 2022-2028.
