

# Acne Medication Market Size (\$ 13.35 Billion by 2027) Achieves Record-breaking Growth in Meeting Healthcare Requirements

*growth of the global acne medication market is driven by rise in prevalence of acne vulgaris across the world, unhealthy urban lifestyle, surge in pollution.*

PORTLAND, OREGON, UNITED STATES,

August 2, 2023 /EINPresswire.com/ --

Acne or acne vulgaris is a skin disease caused due to clogging of hair follicles with dead skin cells and oil from skin cells. This disease is characterized by pimples, blackheads, oily skin, and scarring. There are two types of acne

including non-inflammatory and inflammatory acne, where the latter takes longer duration to heal and can cause permanent effects on skin. It generally affects skin with comparatively high number of sweat glands such as upper part of chest, back, and face. Acne medications are drugs that are indicated for treatment of acne. These include several prescription and over-the-counter medicines such as retinoids, isotretinoin, antibiotics, salicylic acid, benzoyl peroxide, and oral contraceptives.

According to the report, the global acne medication market is expected to reach a value of \$13,357.57 million by 2027, growing at a CAGR of 3.80% from 2020 to 2027. The report provides a detailed analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive landscape, and evolving market trends. The market study is a helpful source of information for the frontrunners, new entrants, investors, and shareholders in crafting strategies for the future and heightening their position in the market.

Covid-19 scenario:

- The majority of the dermatology clinic closed their services since the outbreak of Covid-19 and the number of hospitals and clinics is temporarily converted into Covid-19 centers.

- After several governments imposed social distancing norms and lockdown across the country, people have shifted toward telemedicine to treat acne diseases.
