Definition:
A chatbot for banking is an AI-powered virtual assistant designed to interact with customers and provide banking-related services and support through natural language conversations. These chatbots are typically integrated into banking websites, mobile apps, messaging platforms, and other digital channels to enhance customer engagement, streamline processes, and provide 24/7 assistance.It's important for a banking chatbot to be well-designed, user-friendly, and compliant with security and privacy regulations. Regular updates and improvements based on customer feedback and changing needs are also crucial for maintaining a successful banking chatbot.

Revenue and Sales Estimation — Historical Revenue and sales volume are presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well-recognized Types and end-use industry.
