Increase in use of smartphones and the internet globally and increase in demand for the customized electronic trading platform from government and non-profitable banks drive the growth of the global online trading platform market. Moreover, technological advancements and integration of trading platforms on smartphones, focus on business expansion by market players and rise in demand for cloud-based solutions are expected to offer potential opportunities for the market during the forecast period.

The online trading platform market is segmented into Component, Type, Deployment Mode and

Application. Depending on component, the market is divided into platform and services. On the basis of type, it is categorized into commissions and transaction fees. On the basis of deployment model, it is bifurcated into on-premise and cloud. On the basis of application, it is segmented into institutional investors and retail investors. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

COVID-19 Scenario:

□ The outbreak of the COVID-19 pandemic had less negative impact on the growth of the online trading platform industry as the adoption of online trading solutions increased significantly.

□ Increase in adoption of online trading platforms during the pandemic was due to surge in artificial intelligence in form of robo-advisory, increase in sales of smartphones and work-from-home policies.

Thanks for reading this article, you can also get an individual chapter-wise section or region-wise report versions like North America, Europe, or Asia.
