

Mouthguard Market Booms to \$369.9 million with Remarkable CAGR of 6.6% from 2021 to 2030

Increased popularity of sports, namely, basketball, hockey, football, and boxing and the corresponding youth participation in such sports drives the market

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220U, UNITED STATE, August 7, 2023

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Mouthguard Market](#) by Type, Material, and Sales Channel: Global Opportunity Analysis and Industry Forecast, 2021-2030,"

The global mouthguard market size was valued at \$189.4 million in 2020, and is projected to reach \$369.9 million by 2030, registering a CAGR of 6.6% from 2021 to 2030. In 2020, the boil and bite mouthguard segment accounted for the highest share in the market. These types of mouthguard are usually made from ethylene-vinyl acetate (EVA). This device is thermoplastic rim, which is heated in hot water and then placed in the mouth to be adapted to the teeth by biting down. However, it is often bulky, and does not retain its shape over time.

Increased popularity of sports, namely, basketball, hockey, football, and boxing and the corresponding youth participation in such sports drives the market. Moreover, rise in consumer spending on mouthguard is observed in developed economies such as the U.S. As per the statistics, consumer spending on mouthguard has increased from \$66 million to \$84 million from 2010 to 2014 in the U.S., which has further supported the mouthguard market growth.

Rise in participation in sports activities, growth in consumer spending on mouthguard, increase in health consciousness among consumers, prominence of national & international sports

events are the mouthguard market trends which is likely to foster the growth of mouthguard industry. However, availability of cheap and counterfeit products restrains the market growth. Increase in penetration of online retail is expected to offer lucrative mouthguard market demand over the forecast period.

According to the mouthguard market analysis, the market is segmented on the basis of type, material, sales channel, and region. By type, it is divided into stock mouthguard, boil and bite mouthguard, and custom-fitted mouthguard. On the basis of material, the market is split into vinyl resins, natural rubber, acrylic resins, and polyethylene-polyvinylacetate copolymer. Based on sales channel, the market is segmented into specialty retail stores, multi-retail stores, and online stores & others. The market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on type, the boil and bite mouthguard segment held the major share in the market and is expected to remain dominant throughout the forecast period. These types of mouthguard are sold at sporting goods stores, inexpensive and offer a better fit than stock mouthguard.

Based on material, the polyethylene-polyvinylacetate copolymer material segment gain a major traction in the market. The material have an optimal consistency, energy absorption, and strength in order to cushion the traumatic impact.
