Entertainment Ventures LLC, an industry leader in cutting-edge sports creative and technology, is proud to unveil its latest innovation – the Esports Pod. This groundbreaking device is designed to offer immersive training experiences across multiple industries, including aviation, heavy equipment, automotive, and esports.

Specifically, the Esports Pod holds immense potential in the multi-billion dollar competitive gaming industry and the burgeoning realm of high school and collegiate esports. The innovation sets a new standard for esports gaming. Unlike traditional simulators, each Esports Pod is equipped with standardized internet speed and equipment, emphasizing skill and talent over any advantage of superior software. That is, the Esports Pod paved the way to ensure a level playing field for all participants.

The model setup

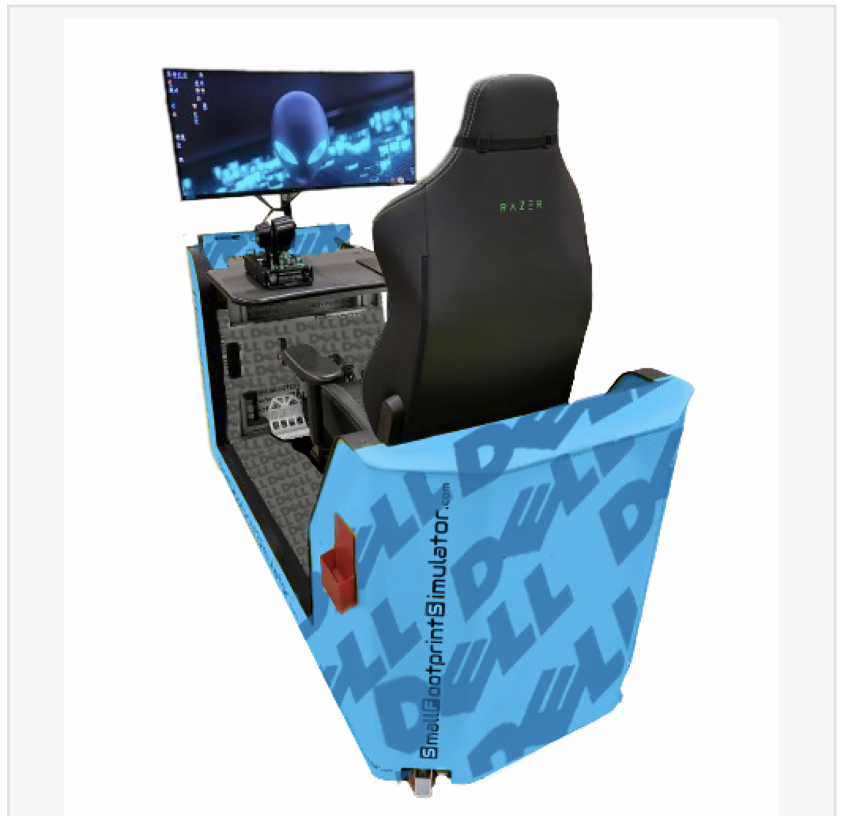

On the desktop of the Esports Pod

Over the past few years, the growth of esports programs in high schools, community colleges, and universities has been remarkable, extending their reach to broader student populations and fostering larger and more inclusive campus communities. Currently, most esports scholarships offer students \$500-\$8,000 annually, but schools are starting to provide full-tuition scholarships as the esports industry grows. Individuals who excel within these schools at esports tournaments are now offered scholarships to go to college. In response to the growing trend in competitive gaming, USA Entertainment Ventures LLC designed and produced a new gaming pod that will maximize the efficiency of holding tournaments.

Together with Dell Technologies, USA Entertainment Ventures LLC wished to distribute these Esports Pods to educational institutions nationwide, opening the door for more high schools, community colleges, and universities to embrace the exciting world of esports.

USA Entertainment Ventures LLC is extending the exclusive media rights of the Esports Pods to the 34 universities and 192 colleges participating in the Esports league, providing sponsorship sales rights, on-demand and streaming rights, pod usage rights, and NIL access to students for sponsorships. USA

USA Entertainment Ventures LLC can also be the liaison between the institution and the sponsor. Through its extensive network and expertise, USA Entertainment Ventures LLC can help facilitate meaningful partnerships that may amplify students' engagement in the esports community and assist them in fostering strong ties with educational establishments.

As the industry grows rapidly, students and aspiring gamers can explore new opportunities and potentially secure substantial prizes through this pioneering technology. USA Entertainment Ventures LLC recognizes the growing trend in esports and has created a product that does the following: 1) Offers institutions and students valuable resources 2) Helps achieve sponsorship and advertising needs.

#### High-Speed Internet

USA Entertainment Ventures LLC ensures that the pods are equipped with high-speed internet, wi-fi, and 110V plug-ins, essentials for enhancing a player's performance.

#### Exceptional Warranty Coverage

Each Esports Pod unit comes with exceptional warranty coverage backed by Dell Premium Support Plus. This 4-year warranty provides comprehensive protection against drops, spills, and surges, all with zero deductible, giving users peace of mind and confidence in their investment.

#### Seamless Technical Support

In the event of any technical issues, the Esports Pod offers seamless technical support through multiple channels, including chat, email, and phone. Users can access prompt assistance and resolution, minimizing disruptions and maximizing productivity during training or gaming sessions.

#### Live-Streaming Capabilities

Embracing the future of content creation and education, the Esports Pod features cutting-edge live-streaming capabilities. Content creators, educators, and gaming enthusiasts can share their experiences and expertise with a broader audience, opening exciting avenues for engagement and learning.

#### User-Friendly Shipping and Assembly

The Esports Pod comes completely assembled with the Alienware 38 Curved Gaming Monitor – AW3821DW, the Razer BlackWidow V3 Pro Mechanical Wireless Gaming Keyboard, the Razer Basilisk V3 Customizable Ergonomic Gaming Mouse, and a Gaming Chair with built-in lumbar arch, optimized cushion density, and eco-friendly synthetic leather. The pod can also roll through doorways and easily be placed on elevators. This convenience ensures that users can quickly get started with their training or gaming experiences without unnecessary delays or complications.

#### Customizable Accessories

The Esports Pod is highly customizable to cater to individual preferences and optimize user experiences. Enhance your training or gaming setup with a wide range of accessories, including the Thrustmaster T248 RS GT Wheel and Pedal Set, the TSS Handbrake Sparco Mod Plus, and more, tailoring the Esports Pod to suit specific needs.

USA Entertainment Ventures LLC is thrilled to introduce the Esports Pod, as it combines the latest advancements in technology with our hope to bring not only durability, comfort, and cross-

training functionality but also equity and inclusion into schools. We sincerely invite businesses, educational institutions, and gaming enthusiasts alike to explore the boundless possibilities offered by this state-of-the-art device.

#### About USA Entertainment Ventures
