

# Interstitial Cystitis Market Size To Hit US\$ 3,286.5 Million By 2033

BROOKLYN, NY, USA, August 9, 2023 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "Interstitial Cystitis Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2023-2033", the interstitial cystitis market size reached US\$ 1,839.1 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 3,286.5 Million by 2033, exhibiting a growth rate (CAGR) of 5.28% during 2023-2033.

## What is Interstitial Cystitis?

Interstitial cystitis refers to a long-standing condition that incites discomfort and pressure in the pelvic area or bladder, primarily affecting women more than men. It can develop irrespective of age, exhibiting symptoms like chronic pelvic pain, urinary urgency, discomfort as the bladder fills, and relief post-urination. The condition can also disturb sleep, possibly leading to depression and negatively impacting one's quality of life. Diagnosis involves assessing the patient's medical history, a physical examination, and specific tests, such as a urine culture to exclude urinary tract infections and a cystoscopy to inspect the bladder lining. A urodynamics test may be suggested to analyze bladder function and volume. Interstitial cystitis is typically identified after other similar conditions have been eliminated.

## What are the growth prospects and trends in the industry?

Interstitial cystitis refers to a long-standing condition that incites discomfort and pressure in the pelvic area or bladder, primarily affecting women more than men. It can develop irrespective of age, exhibiting symptoms like chronic pelvic pain, urinary urgency, discomfort as the bladder fills,

and relief post-urination. The condition can also disturb sleep, possibly leading to depression and negatively impacting one's quality of life.

Diagnosis involves assessing the patient's medical history, a physical examination, and specific tests, such as a urine culture to exclude urinary tract infections and a cystoscopy to inspect the bladder lining. A urodynamics test may be suggested to analyze bladder function and volume. Interstitial cystitis is typically identified after other similar conditions have been eliminated.

#### Competitive Landscape With Key Players:

The competitive landscape of the interstitial cystitis market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

- AbbVie
- Seikagaku Corporation
- Urogen Pharmaceuticals
- Bene-Arzneimittel

#### Countries Covered:

- United States
- Germany
- France
- United Kingdom
- Italy
- Spain
- Japan

#### Analysis Covered Across Each Country:

- Historical, current, and future epidemiology scenario
- Historical, current, and future performance of the interstitial cystitis market
- Historical, current, and future performance of various therapeutic categories in the market
- Sales of various drugs across the interstitial cystitis market
- Reimbursement scenario in the market
- In-market and pipeline drugs

This report also provides a detailed analysis of the current interstitial cystitis marketed drugs and late-stage pipeline drugs.

#### In-Market Drugs:

- Drug Overview
- Mechanism of Action
- Regulatory Status
- Clinical Trial Results
- Drug Uptake and Market Performance

Late-Stage Pipeline Drugs:

- Drug overview
- Mechanism of action
- Regulatory status
- Clinical trial results
- Drug uptake and market performance

Key Highlights of the Report:

- Market Performance (2017-2022)
- Market Outlook (2023-2033)
- Market Trends
- Market Drivers and Success Factors
- Impact of COVID-19
- Value Chain Analysis
- Comprehensive mapping of the competitive landscape
