[Born Torn](#), the inaugural entry in her Kiara Noir Mother Nature Series. This novel rejuvenates the YA Fantasy landscape with a seamless blend of environmental consciousness, cultural duality and magical realism. At its heart, the story follows sixteen-year-old Kiara, who, feeling trapped in a Colorado reservation, envisions a world of travel and photography as her liberation. But the story goes much deeper than that, and though the novel captures the essence of traditional YA themes, it infuses them with fresh

perspectives, dynamic settings, and a narrative that challenges the conventions of the genre, a combination that ensures *Born Torn* stands out in a crowded YA landscape.

Before diving into the world of Young Adult fiction with *Born Torn*, Suz Eglington showcased her literary prowess across various genres. Yet, amid her shifts in literary focus, a yearning to embrace YA Fantasy persisted. When asked what ultimately inspired her foray into this genre, Eglington remarked, "The last four years of events in the world brought me to write *Born Torn* in 2023."

It seems her instincts were spot on, with early reviews raving about *Born Torn*, heralding it as a refreshing addition to the YA landscape and an undeniable testament to Eglington's versatility as a writer.
