Seamless Pipes Global Market Report 2023

These types of pipes refer to solid steel pipes, which are in sheet or bar form and are formed into a solid round shape and then heated and cast over a form such as a piercing rod to create a hollow tube or shell. These are lightweight pipes with benefits such as high-temperature resistance, fatigue resistance, and good impact resistance and are used for applications such as transportation of water or oil, and heavy wall tubing applications that can withstand high pressure or perform in extreme environments.
