Global Flow Chemistry Market Forecast 2023-2032 – Market Size, Drivers, Trends, And Competitors

The Business Research Company's Flow Chemistry Global Market Report 2023 – Market Size, Trends, And Market Forecast 2023-2032

Flow Chemistry Global Market Report 2023 – Market Size, Trends, And Market Forecast 2023-2032

LONDON, GREATER LONDON, UK, August 15, 2023 /EINPresswire.com/ -- The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032

The Business Research Company's "Flow Chemistry Global Market Report 2023" is a comprehensive source of information that covers every facet of the market. As per TBRC's market forecast, the flow chemistry market size is predicted to reach $3.27 billion in 2027 at a CAGR of 11.9%.

The growth in the flow chemistry market is due to the increasing pharmaceutical industry. North America region is expected to hold the largest flow chemistry market share. Major players in the flow chemistry market include AM Technology Co Ltd., CEM Corporation, Milestone Srl, Biotage AB, Syrris Ltd., Vapourtec Ltd., ThalesNano Inc., Hel Group, Uniqsis Ltd.

Flow Chemistry Market Segments

- By Reactor: Microreactor Systems, Continuous Stirred Tank Reactor (CSTR), Plug Flow Reactor, Meso Reactor
- By Technology: Gas Based Flow Chemistry, Photochemistry Based Flow Chemistry, Microwave Irradiation Based Flow Chemistry
- By End-User: Pharmaceutical, Chemical, Academic and Industrial Research, Petrochemical
- By Geography: The global flow chemistry market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Flow chemistry helps chemists have better control and safety over reaction parameters and enhances reactivity. These are also used in the production of Tamoxifen and Artemisinin chemical agents. Flow chemistry offer the possibility of using organometallic reagents with many benefits, including precise temperature control of potentially exothermic reactions and safe handling of highly reactive organometallic intermediates.
