Kenneth W. Welch Jr., a thought leader in the field of sustainable energy, provides a unique perspective on the summit. With his extensive experience in wave-driven hydropower systems, he paints a vivid picture of the global energy landscape.

“The UN's 2030 Agenda is strong, but now is the time for action,” Mr. Welch emphasizes. He recognizes the potential of hydropower but also the challenges that must be

addressed, stating, “Hydropower is essential, but it’s not a simple solution. We need global collaboration, technological innovation, and a commitment from nations that have been slow to embrace sustainable practices.”

The US Reporter article delves into the UNSD Summit's comprehensive approach, focusing on five central pillars—people, planet, prosperity, peace, and partnership. It highlights interactive

dialogues on critical themes such as ending poverty, empowering women, fostering sustainable growth, and combatting climate change.

Mr. Welch's insights serve as both a guide and a challenge: "Sustainability is possible, but it requires hard work, realistic planning, and a willingness to confront the difficult truths." His words resonate as a call to action, a reminder that the journey towards a sustainable future is a complex endeavor requiring innovation, collaboration, and determination.
