The global Public Key Infrastructure market size was valued at USD 2277.8 million in 2021 and is expected to expand at a CAGR of 15.06% during the forecast period, reaching USD 5285.29 million by 2027.

PKI is a security technology framework of encryption and cybersecurity that helps secure the communication between the server and the client. The technology works using 2 different cryptographic keys, namely, a public key and a private key. To communicate over the website, the public key has to be supplemented with a private key that is held by a trusted party. It protects the user's information from theft or tampering. To achieve secure communication, organizations are adopting the Secure Sockets Layer (SSL) certificate that uses public key infrastructure for encryption and authentication. The certificates issued by certificate authorities are trusted and can be used to authenticate entities. The trust hierarchy in issuing digital certificate includes various entities, such as root certificate authority, intermediate certificate authorities, and issuing certificate authorities.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Public Key Infrastructure market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation. Further, mergers & acquisitions, emerging market trends, the impact of COVID-19, and regional conflicts will all be considered.

In a nutshell, this report is a must-read for industry players, investors, researchers, consultants, business strategists, and all those who have any kind of stake or are planning to foray into the

market in any manner.

Global Public Key Infrastructure Market:

Global Public Key Infrastructure Market is segmented into various types and applications according to product type and category. In terms of Value and Volume, the growth of the market is calculated by providing CAGR for the forecast period for years 2023 to 2030.
