DearMob iPhone Manager as the Best Companion for iPhone & iPad Users:

- Fully or selectively backup iPhone without iTunes

The data security specialist from the DearMob team suggests every user back up their iPhone before updating to the new iOS 17. DearMob offers an incremental backup solution with a military-grade encryption algorithm to prevent data leaks. Users can easily create multiple backup copies from their iPhone and iPad for ease of mind. Selective backup features make it easy to backup only photos, videos, and 15+ types of files, without the redundancy of system caches.

- 1-click iPhone migration, ideal for those planning to purchase the upcoming iPhone 15
- While wireless data migration such as iCloud or Airdrop can be fast for a handful of files, the wired method is more stable and keeps data intact when it comes to full device backup and restore. DearMob iPhone Manager allows users to easily move everything from their old iPhone to the new iPhone, with the option to preserve app data and system settings.

- Transfer photos, files, and app data without accidental data erasing

DearMob supports 3-way transfer securely: from iPhone to computer, from computer to iPhone, and from iPhone to iPhone. When transferring media files, the content is added to the device, instead of replacing the existing files – a nightmare that many iTunes users have experienced,

which wipes out precious assets from the device.

- Handy toolkit to create ringtones and more

Answering the needs of iPhone users, DearMob iPhone Manager integrated many handy features: a built-in custom ringtone maker, the option to merge duplicated contact cards, convert incompatible movies into playable format when transferring the video, encryption utility to password protect sensitive photos and files and so much more.

While everybody is waiting for Apple's autumn event, don't miss out on the exclusive 65% discount, version 6.2 giveaway, and an array of incredible software gifts – for seamless iPhone data transitions, secured backups, and easier digital life.
