

Unveiling 10.3: Astera Announces AI-Powered Data Extraction and New Add-ons for Unified Data Management

Now available: Generative AI capabilities and cutting-edge add-ons that make data preparation and analytics a breeze for our customers.

WESTLAKE VILLAGE, CALIFORNIA,
UNITED STATES, August 22, 2023

/EINPresswire.com/ -- [Astera](#), a

pioneering force in data solutions, has recently unveiled the highly anticipated

release of Astera 10.3. This version introduces cutting-edge AI capabilities that streamline and expedite end-to-end data management processes. The newly integrated generative AI functionalities enable lightning fast data extraction, empowering large enterprises to swiftly derive valuable insights and make well-informed decisions. Additionally, Astera introduces two new

add-ons—Astera Data Prep and Astera Data Analytics—to expedite data preparation and enable advanced analytics, revolutionizing the landscape of data management.

“

Our primary objective is to empower customers in fast-tracking their data-driven initiatives, and the new generative AI capabilities and new add-ons will play a vital role in achieving this goal”

Jay Mishra, COO of Astera Software.

A Quantum Leap in Data Management

Astera now offers AI-powered data extraction capabilities. Employing generative AI technology, this tool seamlessly generates templates for multiple files concurrently. Users can specify document types and layouts, and intelligent AI algorithms will automatically extract and process data from a multitude of documents 90% faster, substantially saving time and resources.

Astera Data Prep and Data Analytics are two new add-ons to the platform. Astera Data Prep offers a user-friendly interface that focus on providing a clear preview of data. With Astera Data Prep, users can ingest, clean, transform, and integrate data in one centralized location. Astera Data Analytics enhances data science workflows across all Astera products, enabling users to

evaluate models, fine-tune parameters, and ensure precision effortlessly. The user-friendly interface streamlines visualization and collaboration, fostering AI initiatives and driving substantial business growth.

Astera has also implemented a range of enhancements within its core solution. Noteworthy upgrades include an AI Auto-Mapper in Astera Centerprise for precise field mapping, modern authentication support, and streamline version transitions. Astera Data Warehouse Builder accelerates the creation of business intelligence-ready data warehouses. Furthermore, Astera API Management ensures secure API integration through new features, encompassing pre-built CAPI connectors, a developer portal, and multipart/form-data support.
