

GOLD Multiverse Launches, Ushering in an Era of Limitless Digital Imagination

NEW YORK , NY, UNITED STATES, August 21, 2023 /EINPresswire.com/ -- GOLD Multiverse, a platform incorporating the DucatusX blockchain, is excited to announce the launch of its state-of-the-art platform on August 15, 2023. The GOLD Multiverse portal, accessible at <https://www.gold-mv.com>, invites users to a realm of boundless interaction and innovation. With the GOLD MV token acting as the platform's official currency, participants can engage in various events and procure products from the vast digital expanse and beyond.

A truly dynamic platform, the GOLD Multiverse will be constantly evolving as current projects progress and more metaverses are onboarded in the future. In its initial phase, it will offer unique metaverses like the Garden of Life, META GYM, Meta Pizzeria Network (MPN), and much more. Along with virtual experiences, each metaverse will also be offering various digital products.

"The Multiverse can be anything you envision," said Ronny Tome, founder and Executive Chairman of the Ducatus Group. "From incredible floating structures in the universe to unique destinations on our planet, our platform empowers users to think outside the box, making the multiverse endlessly captivating."

One of the platform's groundbreaking features includes seamless integration with blockchain and web-three technology. Not only does this foster security, but it also enhances interactivity. Users can also interact with each other in safe and private spaces and be part of like-minded communities within the multiverse. For instance, the Garden of Life provides users with opportunities to make a tangible impact. Purchasing a Hexagon in the Garden of Life Bali contributes to the welfare of Bali communities. Each buyer will get a Hexagon engraved with their name, date of birth and country of birth on the energy-harnessing Flower of Life. They can get a virtual villa in the Bali metaverse, which they can customize, furnish, and even invite friends over for meetings or tea sessions.

With the foundational infrastructure now in place, GOLD Multiverse is shifting its focus towards utility, features, and expanding its user base. Soon, the platform will introduce seminars, yoga sessions, and numerous interactive events. Furthermore, participants can rent or purchase virtual properties. With just a few dollars, they can own villas in Bali or apartments in Dubai. The platform aims to offer an experience like no other, ensuring participants can explore, engage, and evolve within the digital realm.

As the metaverse's potential continues to unfold, GOLD Multiverse remains at the forefront, collaborating with third parties and diversifying its offerings. From corporate metaverses to specialized service providers, the platform ensures there's something for everyone.
