

Clinically Tested and Verified Reduced Snoring Pillow from Switzerland Now Available in the United States

SnoreLessNow's products incorporate the latest advancements in sleep science

MT. AIRY, MARYLAND, UNITED STATES, August 24, 2023 /EINPresswire.com/ -- [SnoreLessNow](https://www.snorelessnow.com) is now offering the only clinically tested and verified reduced snoring pillow on the market.

The Maryland-based company's products, including the anti-snore memory foam pillow for snoring reduction and sleep positioning, are available through a partnership with leading Swiss manufacturer Oscimed SA.

The pillow is clinically proven to reduce snoring and improve breathing and its patented incline surface promotes side sleeping for smooth and uninterrupted breathing. The pillow is an alternative to anti-snoring mouthpieces, inhibits age-related increases in snoring and aids pregnant women struggling with snoring.

"When you sleep on your back, your throat's muscles and tongue can fall backward due to gravity. This can make you snore," explained SnoreLessNow CEO Ed Salazar. "Our pillow positions you on your side with a downward tilt. Your airway opens up and the tissues in your mouth are less likely to block your throat, so you snore less."

The advertisement features a large blue 'S' logo on the left and the text 'SNORE LESS NOW' in bold black letters on the right. Below this, a photograph shows a man sleeping on the pillow. To the right of the photo is the product name 'ANTI-SNORE PILLOW SLEEP POSITIONING PILLOW'. Below the photo is a diagram of the pillow with numbered callouts (1-5) pointing to its features: 1. Anti-snoring Inclined Surface, 2. Forehead Support, 3. Natural Memory Foam, 4. 100% Cotton Cover, and 5. Moisture-Wicking Velvet Bamboo Cover. To the left of the diagram is a diagram of a person's head and neck in a side-sleeping position, with the text 'Promotes a natural forward tilt for side sleeping!'. At the bottom left, there is a circular inset showing hands touching the pillow, labeled 'Soft Touch Memory Foam'. At the bottom right, there is a barcode and a 'SWISS DESIGN' logo. The bottom of the ad contains contact information: 'Manufactured for SnoreLessNow™ LLC', '401 Center St. Ste. 104, Mt. Airy, NC 27551', 'Made in France / info@snorelessnow.com', 'Follow us! @SnoreLessNow', and 'www.SnoreLessNow.com'. There are also icons for BPA Free, Lead Free, and other certifications.

“By positioning your head on its side with a forward tilt, it keeps your air passage clear, so you breathe better and snore less,” Salazar added.

SnoreLessNow’s professional sleep consultants are always researching the latest advancements in sleep science to help consumers achieve their best sleep. The company is dedicated to staying up to date on the latest findings and applying that knowledge to improve its products and services.

SnoreLessNow also offers an airflow clip nasal dilator for superior breathing and snoring reduction. The dilator is clinically proven to reduce snoring and improve breathing and is the number one nasal dilator in Switzerland.

Additionally, SnoreLessNow also offers a luxury foam ventilated “Silversafe” pillow for allergy defense and dust mite control. The hypoallergenic pillow uses silver fibers woven into the pillow to combat bacteria.

“Being well rested balances your emotions and enables you to be your best self,” Salazar said. “And since good sleep is uninterrupted, living snore-free with SnoreLessNow means better sleep for loved ones nearby as well.”
