Robo-advisor refers to a type of automated financial advisor that provides algorithm-driven wealth management services with little to no human intervention. The robo advisory is engaged in providing financial advice in an online mode. Robo-advisors offer digital investment management services platforms with the help of automated, algorithm-driven financial planning services with very little to no human intervention. They use an online questionnaire to collect information from clients regarding their financial situation, degree of risk, and future goals, and then use the data to offer advice and automatically invest client assets.
