The mass notification system refers to a platform that sends one-way messages to inform employees and the public of an emergency. Organizations best served by a mass notification system include fire and police departments, emergency management organizations, federal, state, and local governments, cities and communities, building owners and building management companies, and businesses that will justify their need and investment. Such systems will improve the safety and security of an organization by providing alerts and real-time instruction during a crisis. A mass notification system is having a database of names, phone numbers, email addresses, and delivery method.
