

Introducing IntelliCUBE Axial Fans: Mainstream's Innovation in HVAC Technology Continues with More Commercial Solutions

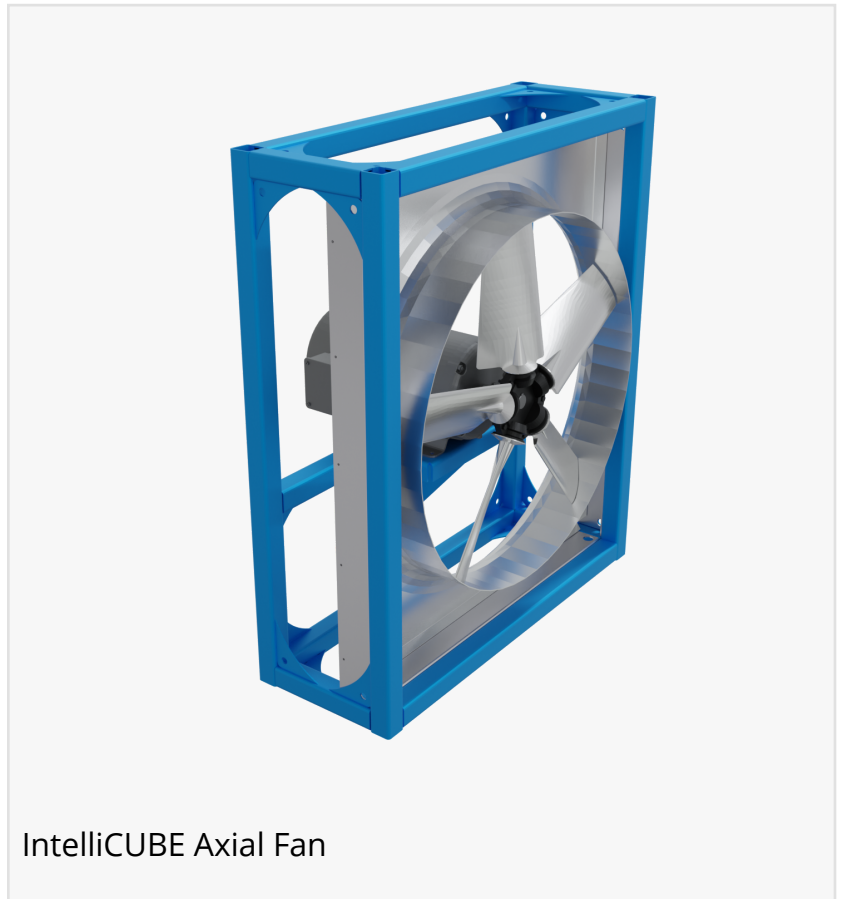

*Revolutionizing HVAC Solutions:
Mainstream Unveils IntelliCUBE Axial
Fans, Offering Unmatched Versatility and
Efficiency with Up to 25,000 CFM per Fan.*

BERKELEY HEIGHTS, NEW JERSEY,
UNITED STATES, September 26, 2023
/EINPresswire.com/ -- [Mainstream](#), a
well-known manufacturer of Air
Handling Unit fans and coils, is excited
to announce the launch of its latest
innovation, [IntelliCUBE Axial Fans](#).
Continuing the legacy of a three-
generation family company,
Mainstream is solidifying its position as
a leader in the HVAC industry.

Mainstream, founded in 1992, has
been committed to providing cutting-
edge solutions for commercial HVAC
applications. Its newest product, the
IntelliCUBE Axial Fan, is a significant leap forward in performance and design. Offering up to
25,000 CFM per fan and static pressure up to 1.5 inches w.g., with a maximum motor size of 10
HP, this advanced fan is suitable for heavy-duty commercial and industrial environments.

Sheldon Markham, Sales Lead at Mainstream, spoke about the company's commitment to
innovation: "With the introduction of IntelliCUBE Axial Fans, we have achieved a balance of
power and adaptability that's unparalleled in the industry. The cube design allows for flexible
arrangements, and the robust, powder-coated, welded steel frames are specifically crafted for
the most demanding applications. We see this as a natural evolution in our product line."

Specifically, these axial fans are ideal as return and exhaust fans, and can be utilized in
applications including garage exhaust and data center applications.

IntelliCUBE Axial Fans offer a unique blend of efficiency and durability. Unlike traditional fans, but similar to other IntelliCUBE products, the cube design can be stacked in arrays of any size and arrangement, allowing customization to specific needs and environments.

Sheldon Markham continued, "What sets the IntelliCUBE Axial Fans apart is their ability to move large volumes of air at low pressure. Our commitment to customer-centric solutions has led us to create a product that caters to the specific needs of commercial and industrial HVAC systems. With IntelliCUBE Axial Fans, we're not just offering a fan; we're providing a scalable solution that can grow with our clients' businesses."

IntelliCUBE Axial Fan Array

Building on the success of previous product lines, Mainstream's IntelliCUBE Axial Fans are set to redefine industry standards.

“

With IntelliCUBE Axial Fans, we're not just offering a fan; we're providing a scalable solution that can grow with our clients' businesses.”

Sheldon Markham, Sales Lead, Mainstream Fluid & Air

Mainstream's commitment to knowledge, innovation, and integrity continues to drive the company forward. As it celebrates over three decades of manufacturing excellence, the launch of IntelliCUBE Axial Fans marks a new chapter in the company's history.

[About Mainstream](#)

Mainstream was founded in the early 90's as a family business in Northern New Jersey, manufacturing coils and other HVAC components. Over the past three decades,

Mainstream has grown and evolved into one of the leading manufacturers of air handling systems and equipment. Continuous, iterative product development, paired with a steady expansion of production capability and a strong culture of service, has Mainstream positioned for robust growth throughout the next decade.

Mainstream's commitment to excellence in product development, service, and employee satisfaction has earned it a reputation as a trusted partner in the HVAC industry. The company's

dedication to innovation and integrity ensures that its products and services meet the highest standards of quality and reliability.
