

D-Central Opens Pre-Orders for MiniBit 1366 Batch 1 Powered by Bitaxe Ultra

*Empowering Personal Bitcoin Mining:
Experience Industrial-Scale Efficiency
from the Comfort of Your Own Room*

LAVAL, QC, CANADA, August 31, 2023 /EINPresswire.com/ -- D-Central Technologies, internationally recognized as a Bitcoin mining service pacesetter, is driving evolutionary changes destined to make their mark on the Bitaxe mining ecosystem. The company's ceaseless dedication to inventive change is mirrored in the adaptation of its services, continually refined to address the dynamic needs of their diverse client base.

Bitaxe DIY Kit Case from D-Central

The recent update, a cornerstone in Bitaxe miner usability, obviates the former requirement for an ESP32 programmer and TAG connect cable. This successful effort to simplify setup protocols effectively dismantles traditional operational challenges, guiding the Bitaxe platform towards improved user-friendliness and cost-effectiveness.

“

The MiniBit 1366 reasserts our dedication to cutting-edge and superior products to our customers. You can now mine with the same efficiency as those enormous mining farms, right from your room.”

Jonathan Bertrand

Jonathan, illustrious CEO of D-Central Technologies, details the company's significant stride in enhancing Bitaxe's approachability and affordability. The fine-tuned modification brings substantial benefits, including:

Smaller Initial Investment: This comes from the

circumvention of the need for ancillary hardware, highlighting cost savings.

Heightened User Experience: The setup process has been streamlined for efficiency and user ease.

Broadened Accessibility: The easy-to-use technology ushers in an influx of new entrants to the Bitaxe mining field.

In a separate but equally significant development, D-Central is ramping up pre-orders for the vanguard batch of [MiniBit 1366](#), a high-performing offering powered by Bitaxe Ultra. Jonathan communicates the company's commitment to progressive product development, "The MiniBit 1366 underlines our ongoing pledge to deliver advanced, high-quality products."

Core attributes of the MiniBit 1366 incorporate:

Stand-alone Mining: Incorporation of WiFi facilitates a direct route to mining pools.

Maximized Efficiency: The inclusion of the robust BM1366 chip from Bitmain powers operations.

Flexibility: The device's adaptive capabilities make it well-suited for solo or pool mining applications.

Following successful roll-out of the first batch of MiniBit 1366, D-Central outlines plans to launch a [DIY Kit](#) for Bitaxe Ultra. It is suggested that those interested in pursuing the DIY path begin with the currently available BM1397 DIY Kit.

September brings forth another noteworthy D-Central release, the [Little Miner](#) Plushie. Part of a limited-edition collection from HODLand, Little Miner embodies the unyielding spirit of Bitcoin. The plushie stands as a strong advocate of the proof-of-work principle and symbolizes the staunch resolve that underscores Bitcoin. It is a truly unique piece set to light up personal spaces and infuse them with the essence of committed mining.

D-Central Technologies provides an opening to reshape the Bitcoin mining experience with the MiniBit 1366. Progressively charting the future of Bitcoin mining, D-Central stands as a testament to innovation in the field.
