

Hemp Clothing Market Expected to Reach \$23.02 Billion by 2031 | United By Blue, ToadandCo, Jungmaven

The Cannabis sativa plant, which is more famous for generating marijuana or hashish, is used to make hemp fibre.

PORTLAND, 5933 NE WIN SIVERS DRIVE, UNITED STATES, September 1, 2023 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Hemp Clothing Market](#)," The hemp clothing market size was valued at \$2.29 billion in 2021, and is estimated to reach \$23.02 billion by 2031, growing at a CAGR of 27.1% from 2022 to 2031.

Hemp Clothing Market-AMR

Hemp is an industrial variation of cannabis plant. It is the most useful plant known to mankind. In fact, cannabis sativa means useful (sativa) hemp (cannabis). It is used to make over 25,000 different products, most of which are superior alternatives to less environmentally friendly products. Some of the products made are: clothing, shoes, diapers, rope, canvas, cellophane, paints, fuels, chain lubricants, biodegradable plastics, paper, fiberboard, cement blocks, food, cosmetics, and soap. Hemp is the longest and strongest natural fiber known to man, with its use dated back over 10,000 years.

The hemp industry continues to provide substantial innovations with regards to cultivation and machinery to develop hemp plants more efficiently. Innovation in cultivation and machinery gives farmers the ability to make plantation and harvest of industrial hemp triple in volume.

One example of these latest technological inventions of the hemp industry is machinery developed by Canadian Greenfield Technologies Corporation. They have smart design which allows farmers to separate and process raw hemp by separating fibers, hurds, and leaves upon

harvest. This technology makes it easier for farmers to produce and distribute hemp for commercial use. In addition, these components can be achieved quickly by using this machine, which the hemp industry use as ingredients to mix with other products. Technological innovations through manufacturing and cultivation machines makes every hemp industry capable of producing hemp fabric more than traditional farming. Thus, technological inventions with regards to the hemp industry further augments the hemp clothing market growth.

The Hemp Clothing Market opportunity is segmented into type, end user, distribution channel, and region. On the basis of type, the market is categorized into Shirts, Pants, T-shirts, Activewear, Coats and Jackets, Dress, Undergarments and Others. On the basis of End User, the market is categorized into men, women and kids. On the basis of Distribution Channel, it is fragmented into supermarket/hypermarket, independent retail stores, online sales channel and others. Region-wise, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (UK, Germany, France, Italy, Spain, Russia and rest of Europe), Asia-Pacific (China, India, Japan, Australia, South Korea, and rest of Asia-Pacific), and LAMEA (Latin America, Middle East and Africa).
