Prime determinants of growth

The increased demand for digital lending options, increased use of gift cards as a rewards and incentives, and increased consumer preference for experiences over tangible gifts, offers to drive the growth of the global gift card market. However, limited acceptance of gift cards is a major factor hampering the growth of the market as gift cards issued by a specific retailer or brand are often only accepted at that retailer stores or online shop and cannot be used at other businesses. In addition, security concerns pertaining to the use of gift card is also a major restraining factor for the market growth. On the contrary, the rise in popularity of gift cards among separate sets of users including corporate clients and individual users will provide major lucrative opportunities for the growth of the market.

The closed-loop card segment to maintain its leadership status throughout the forecast period

Based on card type, the closed-loop card segment attained the highest growth in 2022, accounting for more than two-thirds of the global gift card market revenue, and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the fact that by offering closed loop gift cards, a company may increase brand recognition and customer loyalty as customers may associate the card with that specific brand. Moreover, closed loop gift cards are a convenient and easy gift option for customers as they may be used at a specific store and do not have to be redeemed for cash. However, the open-loop card segment is projected to manifest the highest CAGR of 20.8% from 2023 to 2032. This is due to the fact that open loop gift cards may be used at many different retailers and online merchants, giving the recipient more choices on where to spend their gift. Moreover, they are easy to purchase and may be delivered electronically, making them a convenient gift option for last-minute or long-distance gifts.

The retail establishment segment to maintain its leadership status throughout the forecast period

Based on end user, the retail establishment segment is the highest growing segment, accounting for more than two-thirds of the global gift card market revenue, and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the fact that they may increase sales and revenue by encouraging gift card recipients to visit the store and make purchases. This may lead to new customers and increased brand awareness. Meanwhile, the corporate institutions segment is projected to manifest the highest CAGR of 20.1% from 2023 to 2032. This is attributed to the fact that gift cards may serve as a versatile and cost-effective way to reward and incentivize employees, customers, or partners. Moreover, they may provide valuable insights into consumer behavior and preferences, which may help to form marketing and sales strategies. Overall, gift cards may be a valuable tool for corporate institutions to enhance engagement, retention, and profitability.

North America to maintain its dominance by 2032

Based on region, North America held the highest market share in terms of revenue in 2022, accounting for more than two-fifths of the global gift card market revenue. This is attributed to the fact that the convenience of gift cards makes them a popular choice for both gift givers and recipients in the region. They offer flexibility in terms of both purchase and redemption, as they may be used online or in-store. Moreover, the increase in popularity of e-commerce and mobile shopping has resulted in a shift toward digital gift cards, which are expected to see significant growth in the coming years. Overall, these factors are expected to drive continued growth in the gift card market in North America. However, the Asia-Pacific region is expected to witness the fastest CAGR of 20.8% from 2023 to 2032, and is likely to dominate the market during the

forecast period. This is because of the growth of e-commerce and mobile payments in the region which has made it easier to purchase and redeem gift cards online. Moreover, the increase in popularity of cashless transactions in the region has also contributed to the growth of the gift card market.

Leading Market Players: -

AMAZON.COM INC.

AMERICAN EXPRESS COMPANY

BLACKHAWK NETWORK

FISERV, INC.

GIVEX CORPORATION

INCOMM PAYMENTS LLC

PAYPAL, INC.

PAYTRONIX SYSTEMS, INC.

QWIKCILVER SOLUTIONS PVT LTD.

WALMART INC.

The report provides a detailed analysis of these key players of the global gift card market. These players have adopted different strategies such as partnership, product launch, and expansion to increase their market share and maintain dominant shares in different regions. The report is valuable in highlighting business performance, operating segments, product portfolio, and strategic moves of market players to showcase the competitive scenario.

Key benefits for stakeholders

This report provides a quantitative analysis of the gift cards market segments, current trends, estimations, and dynamics of the gift cards market forecast from 2022 to 2032 to identify the prevailing gift cards market opportunity.

Market research is offered along with information related to key drivers, restraints, and opportunities.

Porter's five forces analysis highlights the potency of buyers and suppliers to enable stakeholders to make profit-oriented business decisions and strengthen their supplier-buyer network.

In-depth analysis of the gift cards market outlook assists to determine the prevailing market opportunities.

Major countries in each region are mapped according to their revenue contribution to the global market.

Gift cards Market player positioning facilitates benchmarking and provides a clear understanding of the present position of the gift cards market players.

The report includes an analysis of the regional as well as global gift cards market trends, key players, market segments, application areas, and gift cards market growth strategies.
