

Key Features of [the BLUETTI EP800 System](#)

Flexible Capacity: The EP800's modular design allows users to choose from two to four B500 battery packs for a maximum of 19,840Wh, which a study found would provide at least two days of power during a prolonged blackout, or six days with a solar system attached.

Powerful Performance: Boasting 7,600W power, the EP800 can run both 120V and 240V appliances effortlessly. Its dual MPPT charge controllers optimize solar input at a max rate of 9,000W, making it ideal for homes in remote areas or with expensive electricity rates.

Responsive Uninterrupted Power: The EP800 switches from mains power to battery power in less than 20 milliseconds during a power outage, providing stable and continuous power for all essential devices.

Easy and Quick Installation: The EP800 can be easily set up in a few hours by handy users or BLUETTI's optional installation team. Its NEMA 4X rating for water, corrosion protection, and quiet operation under 50 dB allows for both indoor and outdoor installation.

Durable Design and Warranty: Encased in a corrosion-resistant aluminum alloy, the EP800 system utilizes the safest and most long-lasting LiFePO4 batteries available and is backed with a 10-year warranty for worry-free use.

Intelligent System: Advanced thermal management technology adapts the EP800 to varying weather conditions, even in temperatures below -20°C. The BLUETTI app also provides convenient remote monitoring and control via WiFi or Bluetooth.

Some homeowners are still waiting in line for the pricey home backup solutions from Tesla Powerwall. Others, however, have their eyes on affordable backup systems like the BLUETTI EP800 that are within easy reach and protect them from outages and high energy bills.

Availability

The BLUETTI EP800 energy storage system will be available on September 15 with a debut price starting from \$8999.

Try [BLUETTI EP800 Free for 30 Days!](#) BLUETTI is currently running an Energy Freedom Program to help households reduce their energy bills and achieve power independence. 30 households with monthly bills over \$100 can apply for a free trial of the EP800 system for a full month. After the trial, they can either return the product at no cost or keep it for an incredible 40% off the retail price. Give it a try as the trial is totally money and worry-free. All it takes is a few clicks to sign up, and BLUETTI will take care of everything from shipping to installation.

Limited offer, grab it now!

About BLUETTI

BLUETTI has been committed to promoting sustainability and green energy solutions since its inception. By offering eco-friendly energy storage solutions for both indoor and outdoor use, BLUETTI aims to provide exceptional experiences for our homes while also contributing to a sustainable future for our planet. This commitment to sustainable energy has helped BLUETTI expand its reach to over 100 countries and gain the trust of millions of customers worldwide.
