

# Medsynaptic Partners with ConcertAI's TeraRecon to bring Advanced Visualization Offering to India

*The agreement allows providers to locally acquire TeraRecon's solutions*

PUNE, MAHARASHTRA, INDIA, September 6, 2023 /EINPresswire.com/ -- Medsynaptic Pvt Ltd, is excited to announce a reseller and service agreement with ConcertAI's TeraRecon for its advanced visualization solution, Intuition™.

Under the new agreement, Medsynaptic will serve as a key distributor in India for the vendor-agnostic medical imaging solution along with its Medsynapse RIS-PACS.

Intuition gives physicians the edge to deliver precise and timely diagnostic interpretations by semi-automating complex image post-processing through advanced workflows. Intuition also enables cross-department consolidation and can eliminate redundant solutions as its designed to deliver clinical decision support throughout the enterprise, including radiology, cardiology, neurology, oncology and vascular surgery.

The latest version of Intuition, 4.7, adds robust cardiovascular AV functionality through a new Left Atrial Appendage (LAA) workflow, updated Transcatheter Mitral Valve Repair (TMVR) workflow, and various enhancements to streamline cardiac coronary imaging and pre-op planning. These tools provide interventionalists with enhanced visualizations, semi-automated measurements, flexible interaction capabilities, and interoperability designed to streamline procedural planning and eliminate the need for multiple AV solutions.

"With the addition of Intuition to Medsynaptic's offerings, clinicians will now have access to productivity-boosting collaboration tools and in-country service and support to ensure radiologists and cardiologists have the edge they need to deliver precise and timely diagnostic

interpretations," said Dr. Ashish Dhawad, CEO of Medsynaptic. "We look forward to working with TeraRecon to deliver intelligent solutions to radiologists and cardiologists at every step."

"The relationship with Medsynaptic in India is one of the latest steps by ConcertAI's TeraRecon to offer mission critical solutions for global customers," says Dan McSweeney, President, TeraRecon. "We are thrilled to expand our work with Medsynaptic in the India markets to offer TeraRecon's best-in-KLAS advanced visualization solutions.
