

Evergreen Solar Solutions Contributes

*Giving Clean Water & Power to
Communities in Need*

ORLANDO, FLORIDA, UNITED STATES,
September 7, 2023 /EINPresswire.com/

-- GivePower, an international non-profit organization dedicated to providing clean water and clean power in developing regions around the

world, has partnered with Evergreen Solar Solutions. With each solar system installed, Evergreen Solar Solutions [gives the gift of power and clean water to communities in need](#). Their contributions as of June 2023 alone will give 275 people the gift of access to clean water for the next 20 years.

Evergreen Solar Solutions

“

Evergreen Solar Solutions is dedicated to making a difference, to bless as many people as possible with energy and clean water. Our partnership with GivePower is just the beginning to reach our goals.”

*Tony Millazo, President of
Evergreen Solar Solutions*

GivePower’s Solar Water Farms utilize solar energy to desalinate either sea or brackish water sources. In addition to removing salt, virus, and bacteria, the systems also eliminate other contaminants including fluoride creating a reliable, affordable source of clean drinking water for communities in need.

“Evergreen Solar Solutions is dedicated to making a difference,” stated Tony Millazo, President of Evergreen Solar Solutions. “It is our passion to bless as many people as possible with energy and clean water. For Evergreen

Solar Solutions, our partnership with GivePower is just the beginning to reach our future goals.”

Access to clean water is considered one of the largest challenges facing the world today. More than 1.42 BILLION PEOPLE (including 450 million children) live in areas of high or extremely high-water vulnerability. This leads to a wide array of issues, from diseases and starvation to income inequality, particularly for women and girls who are often tasked with fetching water. GivePower’s Solar Water Farms are one of the most cutting-edge technological solutions aimed at reversing this problem.

“We are tremendously grateful to Evergreen Solar Solutions for their generous contributions and support of our Solar Water Farm program,” said Michele Magee, President of GivePower. “This

funding will help improve the health and economic opportunities of vulnerable communities in Colombia, Haiti and Kenya.”

Staffed with 124 people worldwide, GivePower builds, installs, and operates Solar Water Farms. With three models, these systems are capable of producing 10,000-75,000 liters of water per day. The operations are fully independent of any local electrical grid and run entirely on clean energy. GivePower’s model has won multiple international awards, including the prestigious Energy Globe Award in Kenya.
