The opioids segment was the largest contributor to the market growth in 2019, opioids segment is the largest contributor toward the market growth, owing to high popularity of these drugs worldwide. However, the anesthetics segment is anticipated to be the fastest growing segment in the market, owing to frequent use of this drug type during surgeries and rise in number of

surgeries globally.

Neuropathic Pain segment accounted for a majority of the pain management drugs market share in 2019 and is expected to exhibit a prominent growth rate during the forecast period, increase in presence of large patient population is the major factor that increases the demand for drugs for neuropathic pain. Cancer pain and chronic back pain were segment is expected to grow at the highest rate throughout the forecast period in 2019, owing to increase in number of surgeries globally and rise in prevalence of chronic diseases that lead to back pain.

On the basis of pain type, the chronic pain segment was the largest contributor to the market growth in 2019, and is expected to grow at a CAGR of 3.9% during the forecast period.

As per the industry experts, long term effect of COVID-19 outbreak is expected to be witnessed over the coming years. This pandemic has disrupted growth in many economies across various domains. The COVID-19 outbreak will impact the pain management drugs market in the initial phase of the forecast period. The COVID-19 pandemic has stressed healthcare systems worldwide, so that many clinics, pain services are no longer open for public services because of safety. Moreover, throughout the latter half of the forecast period, the demand for pain management drugs is expected to rise. Owing to the factors such as telemedicine, physicians are able to provide guidance to patients for physical exercises at-home for pain relief. This is anticipated to increase the market growth in near future.
