

# Same Day Delivery Market Witness a Sustainable Growth by 2027- Aramex, DHL, Dropoff, USA Couriers, FedEx, XPO Logistics

*Same Day Delivery Market to Garner \$20.36 Billion by 2027: Allied Market Research*

WILMINGTON, DELAWARE, UNITED STATES , September 7, 2023 /EINPresswire.com/ -- Same day delivery services are being deployed across numerous countries so as to ensure the timely delivery of products to the end users. Moreover, the demand for same day delivery services has increased due to the fact that the consumers are ready to spend any

amount in order to get the product in a shorter time span. Also, due to this increased demand for quick availability of products, companies have entered into strategic alliances so as to ensure the timely delivery of products, which has also supplemented the growth of the global market.

Efficient and continuous services are required by customers in the goods transportation industry, which enable the operating companies to enhance their services as per the demand. This provides a lucrative growth opportunity for the market players as well as supports the market toward a positive growth.

The global [same day delivery Industry size](#) was valued at \$5.78 billion in 2019, and is projected to reach \$20.36 billion by 2027, registering a CAGR of 21.1%.

Development of e-commerce industry and rise in trading activities due to globalization fuel the growth of the global same day delivery market. On the other hand, poor infrastructure, higher logistics costs, and lack of control of retailers on logistics service impede the growth to some extent. However, emergence of last mile deliveries coupled with logistics automation and cost

cutting & lead time reduction due to adoption of multi-modal system are expected to create multiple opportunities in the industry.

The global same day delivery market is analyzed across application, mode of transportation, end user, and region. Based on mode of transportation, the roadways segment accounted for more than two-fifths of the total market share in 2019, and is expected to dominate by the end of 2027. The same segment would also register the fastest CAGR of 22.3% during the forecast period.
