Covid-19 Scenario:

The outbreak of the COVID-19 pandemic had a positive impact on the global blockchain in insurance market, as the pandemic highlighted the importance of trust and transparency in the insurance industry.

Moreover, the pandemic created new risks for the insurance industry, such as the risk of COVID-19-related claims. Blockchain technology helped insurers assess risk more accurately by analyzing data from various sources, including medical records, social media data, and other sources.

Furthermore, the pandemic emphasized the need for more efficient and cost-effective blockchain solutions in the insurance industry, resulting in increased use of blockchain and IoT-based services.
