Definition:

A Property Maintenance System, often abbreviated as PMS, is a software application or platform used primarily by property managers, landlords, real estate professionals, and property maintenance teams to efficiently manage and streamline the maintenance and upkeep of properties. This system helps ensure that properties are well-maintained, safe, and compliant with regulations.

Market Trends:

The property maintenance software market saw a shift towards cloud-based solutions. This allowed property managers and maintenance teams to access the system remotely, collaborate more effectively, and benefit from automatic software updates.

Market Drivers:

The growth of the real estate sector, including residential, commercial, and industrial properties, drives the need for effective property maintenance solutions. Property owners and managers seek ways to optimize maintenance processes as their portfolios

Market Opportunities:

Developing and offering cloud-based PMS solutions can be a lucrative opportunity. Cloud-based systems provide scalability, accessibility, and cost-efficiency, making them attractive to property managers and maintenance teams.

Target Audience:

Analysts and Strategic Business Planners
New Entrants and Investors
IT Sector
Government Bodies
Other
