Medmio Unveils AI-Powered App to Streamline Medical Billing

Medmio, Inc. is pleased to announce the launch of its groundbreaking automated medical coding app, paving the way for more efficient medical billing.

MARYLAND, UNITED STATES, September 26, 2023 / EINPresswire.com/ -- Medmio, a healthcare IT company headquartered in Maryland, is pleased to announce the launch of its groundbreaking automated medical coding and practice management app designed to reduce healthcare administrative costs, improve efficiency of medical billing, and ultimately reduce the cost of care for patients.

> **"**
> We are thrilled to introduce our innovative app, which will make medical coding more efficient and streamline practice operations for a diverse spectrum of healthcare providers."
>
> *Levan Sulakvelidze, Medmio President & CEO*

Traditional medical coding is error-prone and time-consuming, often leading to delays that impact patient care and practice efficiency. Despite the widespread adoption of electronic health records (EHR) software, many healthcare providers rely on paper fee tickets and outsourced vendors for medical billing and coding. Medmio's new app addresses these challenges head-on by harnessing the power of automated algorithms to optimize coding processes, while also offering practice management features like mobile patient intake, voice dictation, real-time patient worklist, photo and document capture and much more.

Key features of Medmio's app include:

Automated Medical Coding: Providers can use a phone or tablet device to fill out an intuitive questionnaire tailored to their specialty, and the optimal billing codes will auto-populate using a continuously updated database of medical coding rules. The user has complete freedom to update or add codes manually or by using custom saved favorites.
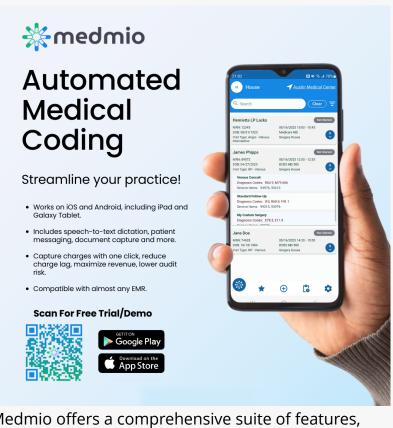

Mobile Patient Intake: Create custom patient intake forms to collect past medical history, physical exam findings, and any other parameters. Patients or users can input the data on a

mobile device, and the information will flow to the EHR.

Real-Time Patient Worklist: Get a live worklist of patients, where the user can quickly see appointment details and status, as well as search, sort and filter the list for a patient. Users can also edit patient details or add new patients directly from the worklist.

Enhanced Efficiency: Eliminate paper fee tickets and manual medical coding, speed up the billing process, reduce errors and administrative burden, lower the risk of an audit. Save valuable time and redirect efforts towards delivering high-quality patient care.

The Medmio app is compatible with iOS and Android devices (including the Apple iPad and Samsung Galaxy

medmio

Automated Medical Coding

Streamline your practice!

- Works on iOS and Android, including iPad and Galaxy Tablet.
- Includes speech-to-text dictation, patient messaging, document capture and more.
- Capture charges with one click, reduce charge lag, maximize revenue, lower audit risk.
- Compatible with almost any EMR.
