XSS-овијација је врста атака која користи веб-страницу као вектор за извршење компјутерске атаке. Овај тип атака користи људску грешку у облику људске погрешке да испуни поле најчешће у формуларима за улазак података, као што су поле за имена, пароле, адресе итд. Ако је овој атаки подложеној веб-страници унапред уређено, она ће исправити ове податке и обновити страницу са новим информацијама, које су укључивале атаку.
