Increasingly popular with celebrities, athletes and regular folks, Scalp Micropigmentation is the non-surgical process of using tiny ink impressions placed on the scalp to produce 3D hair follicle replacement. The look creates the impression of a full head of hair that's been purposely closely cut. Unlike other hair loss solutions, SMP requires no surgery, drugs or long-term maintenance.

Featured on Good Morning America, GLI is an original SMP pioneer and has performed thousands of SMP procedures for men across the globe. The Good Look Ink procedure is typically much faster than other processes that can take 3-5 sessions therefore saving the client time and money. GLI patients can start enjoying an improved appearance in one day."

In online reviews, men embrace GLI's SMP solution for its modern look, minimal invasiveness, high value and low maintenance. SMP is also increasingly popular with women, as it provides the look of added density without the expense of wigs, or the side effects of powders and sprays.

"The GLI look is hot, and we're continuing to explore additional markets to make it as convenient as it is popular, lasting and affordable," said Good Look Ink CEO Roxanne Chihos. "Our mission is to help people restore lasting confidence by restoring a vibrant hairline, and we'll do whatever it takes—and go wherever we need to—to make that happen."

Good Look Ink and Precision Hair Restoration Albuquerque share a commitment to excellence and a passion for helping individuals regain their self-assurance and quality of life. We believe

that this partnership will set new standards in the field of hair restoration and provide clients with the highest level of care and expertise available.

We look forward to this exciting collaboration and the positive impact it will have on the lives of individuals seeking effective hair restoration solutions.
