

CyberLock Offers \$1 True Zero-Trust Endpoint Protection to first 100 SMB and Enterprise Organizations with 50+ Endpoints

OVERLAND PARK, KANSAS, UNITED STATES, September 12, 2023

/EINPresswire.com/ -- Ransomware and data breaches have become the rule, not the exception. It is clear this trend is only going to continue until organizations adopt a True Zero-Trust security posture on their endpoints.

Organizations have been reluctant to embrace Zero-Trust products because they are notoriously untenable, daunting, and lack usability. CyberLock's sole focus has been to create the most effective and robust True Zero-Trust solution, while also making their tech user-friendly for everyone.

CyberLock works in conjunction with Antivirus, EDR, and XDR to fill the blind spots that bypass traditional endpoint protection products.

CyberLock is offering its tech at a ridiculously low price so organizations can realize that True Zero-Trust is possible. This offer applies to the first 100 organizations with 50+ devices, for a term of 1 to 3 years.

Organizations can download a free 15-day trial so they can experience just how simple True Zero-Trust can be.
