"Bigfoot: Monster of the Ice" follows a similar route of mindlessness as most beastly movies. Despite the horror of murder, it includes many human characteristics, such as the love for family, the reaction to the loss of loved ones, the free will to choose, and the greediness that battles many humans. It incorporates science fiction, adventure, and thriller elements into a single story. Bret can be relatable, while Adam will extract some emotion from the audience as a dad struggling to be better for his family. When adapted into a movie, the story is suitable for all ages.
