In the music business Danny was the trifecta he could belt out ballads with his voice, play guitar riffs that would impress and write and perform original music as the front man in several prominent bands. The roster of greats he worked with include Clarence Clemons, Billy Squier Band, King Fish, and the list is long. All of this information is documented in the book released on his life last year by John Farmer Jr. "Way To Fast." Danny's life was taken way

to fast. The book is available on Amazon and explains the story of unsung heroes who have extreme talent yet for one reason or another just don't make it in the music business. The big stage the big money and recognition of a special talent.

The book describes how Danny's music saved the life of the author at a time when he had lost his wife and did not know where to turn. The hit song that brought the author out of his dark

period was " Bye Bye Baby" by Danny DeGennaro. There are several versions of the song released across the country.
