Rise in population and increase in average disposable income drive the development of the construction industry in developing countries, which in turn, has propelled the global foam blowing agents market. On the other hand, several pollution control measures introduced by governments in different regions impede the growth to some extent. However, developments of the furniture industry has paved the way for a number of opportunities in the industry.

The key market players analyzed in the global foam blowing agents market report include Honeywell International Inc. (U.S.), Exxon Mobil Corporation (U.S.), Harp International Ltd. (U.K.), E.I. du Pont de Nemours & Company (U.S.), ZEON Corporation (Japan), Arkema S.A. (France), Haltermann GmbH (Germany), Solvay S.A. (Germany), Daikin Industries, Ltd. (Japan), and

Sinochem Group (China). These market players have adhered to several strategies including partnership, expansion, collaboration, joint ventures, and others to prove their flair in the industry.

Covid-19 Scenario-

The strict government regulations toward the shutdown of transportation sector have led to increase in difficulty in the procurement of the raw materials, which impacted the global foam blowing agents market negatively.□

Scarcity of skilled labor force at the manufacturing sites aggravated the market condition even more.

The global foam blowing agents industry is analyzed across applications, product type, and region.

Based on applications, the polyurethane segment contributed to nearly half of the total market revenue in 2020, and is projected to lead the trail by 2030. The polyurethane segment, moreover, would exhibit the CAGR of 45.9% during the forecast period. The other segments studied in the report include polystyrene and polyolefins.
