

Passenger Car Adhesives Market to Undertake Strapping Growth by 2032

Passenger Car Adhesives Market by Resin Type , Technology : Global Opportunity Analysis and Industry Forecast, 2020-2027

NEW CASTLE, DELAWARE, UNITED STATES, September 18, 2023

/EINPresswire.com/ -- Adhesives are

the most versatile bonding

components used by automakers to

make cars lighter and tougher. It can

be found naturally or can be

synthetically produced. But the

adhesives that are currently utilized in

the automotive industry are mostly

synthetic in nature, which are used to bind metals, composites, plastic, and other materials.

Adhesives are increasingly being used in the automotive industry for binding numerous vehicle

components, such as in doors and chassis modules. Growth in adoption of these glues among

passenger car manufacturers reduces the frame weight of vehicle, increases toughness of front

& rear lateral body, improves crash performance, and reduces noise and vibration. In addition,

adhesive binding leads to construction of new advanced and state of the art passenger car

frame designs. Moreover, adhesives offer high bonding strength equally distributing the stress

across joints and lines. Some of the important physical properties of the [passenger car](#)

[adhesives market](#) include the ability to bind different types of vehicle parts such as dashboards,

door panels, electronics, light covers and lenses as well as steel and alloyed components

together. Therefore, increase in usage of these adhesives is expected to benefit the frame of the

vehicle.

production of the car.

- The governments across the globe have declared lockdown over the past few months, which disrupted the demand and supply cycle of many global passenger car adhesives manufacturers.
- The chemical industry is facing major transportation delays because of travel restrictions.
- Sectors that use adhesives are experiencing varying levels of demand due to both the pandemic and massive reductions in oil prices.
- In this COVID situation, the real manufacturing Gross Value Added (GVA) is estimated to fall by a sharp 4-6% in FY21

Report Summary : <https://www.alliedmarketresearch.com/purchase-enquiry/7862>

Report Summary: The global automotive adhesives market is expected to grow at a CAGR of 4.5% from 2020 to 2027. The market is driven by the rise in demand for lightweight and low-carbon emitting vehicles and technological advancements in adhesives from end-use industries.

Rise in demand for lightweight and low-carbon emitting vehicles and technological advancements in adhesives from end-use industries drive the growth of the global market. However, instability in prices of raw materials is expected to hamper the growth of the market. On the contrary, increase in demand for low volatile organic compounds (VOCs), green and sustainable adhesives provides lucrative opportunity for the market growth.

Report Summary: The global automotive adhesives market is expected to grow at a CAGR of 4.5% from 2020 to 2027.

Report Summary: The global automotive adhesives market is expected to grow at a CAGR of 4.5% from 2020 to 2027.

Severe emission discharge control norms and regulations regarding low-carbon emitting vehicles have compelled manufacturers to take measures for reducing vehicle weight significantly; thereby, boosting the demand for lightweight vehicles. Vehicle weight can be reduced by considerably using adhesives that are used to bind together the frame of the vehicle and increase the toughness of the front & rear lateral body. Therefore, rise in demand for lightweight and low-carbon emitting vehicles boosts the growth of the automotive passenger car adhesives market.

Report Summary : <https://www.alliedmarketresearch.com/passenger-car-adhesives-market/purchase-options>

Report Summary:

- This study presents the analytical depiction of the automotive passenger car adhesives industry along with the current trends and future estimations to determine the imminent investment pockets.
- The report presents information related to key drivers, restraints, and opportunities along with challenges of the market.
- The current market is quantitatively analyzed to highlight the automotive passenger car adhesives market growth scenario.
- It is also determined that adhesives will remain a significant revenue shareholder in the market during the forecast period.
