SharkStriker Revolutionizes Cybersecurity Services with the Launch of "STRIEGO" Platform

A unified multi-tenant open architecture human-led AI/ML-driven security platform designed to meet the cybersecurity needs of today and tomorrow.

WALNUT CREEK, CA, USA, September 21, 2023 /EINPresswire.com/ -- In today's ever-evolving digital landscape, organizations are grappling with an array of challenges when it comes to safeguarding their operations against cyber threats. These challenges include

STRIEGO by SharkStriker

the complexity of security solutions, a shortage of in-house cybersecurity expertise, budgetary constraints, and the complexities of dealing with multiple product vendors. Compliance requirements only add to the complexity.

> "
> With STRIEGO, we aim to simplify and unify cybersecurity services, empowering organizations to protect their digital assets effectively and efficiently."
> *Ajay Kumar (co-founder)*

To help organizations tackle these multifaceted challenges, SharkStriker is proud to announce the launch of its groundbreaking cybersecurity services platform, " STRIEGO." This platform is poised to transform the way organizations approach cybersecurity services, offering a unified solution that addresses a wide spectrum of security and compliance needs.

Traditionally, organizations have had to work with various cybersecurity service providers, each specializing in a specific aspect of security such as firewall management, monitoring, SIEM/SOC, or compliance services. However, this often results in fragmented solutions that do not seamlessly integrate with one another.

SharkStriker's STRIEGO platform is on a mission to simplify the lives of organizations by

providing a comprehensive cybersecurity services portfolio. This platform serves as a centralized hub for all security and compliance needs and is designed to cater to a wide range of organizations, offering multi-tier, multi-tenant capabilities. It operates as a data lake-based solution, available both on the cloud and on-premises, and is backed by a [24/7 Global SOC team](#) for human-led monitoring, threat hunting, incident response, and compliance assurance.

STRIEGO offers a wide array of features, including but not limited to:

 Next-Generation SIEM/XDR
 File Integrity Monitoring (FIM)
 Vulnerability Management
 CIS Benchmark-based Configuration Assessment
 Threat Detection & Response
 Security Automation
 Full-cycle Incident Response
 Real-time Dashboards
 Incident Management
 User Entity Behavior and Analytics (UEBA)
 Network Detection & Response
 Dark Web Monitoring
 Deception Technology

One of the standout features of STRIEGO is its ability to leverage existing security investments made by organizations. It is vendor-agnostic and seamlessly integrates with both third-party security solutions and non-security technologies, ensuring that organizations can maximize the value of their existing resources.

"We understand the complex challenges that organizations face in the cybersecurity landscape," said Ajay Kumar, Co-founder at SharkStriker. "With STRIEGO, we aim to simplify and unify cybersecurity services, empowering organizations to protect their digital assets effectively and efficiently."

SharkStriker's STRIEGO platform represents a significant leap forward in the world of cybersecurity services, providing organizations with a holistic solution that streamlines their security and compliance efforts.
