The organizations are thus making provisions for GDPR training tools for provisions. Such tools are inclusive of interactive quizzes, courses, and other learning materials. Ultimately, security vulnerabilities could be identified, GDPR compliance could be tracked, and data protection policies could be assessed.

GDPR (General Data Protection Regulation) was implemented in 2018. The basic objective is to declare the rights of the citizens of the EU to protect the privacy of their information. The regulation thus gives contractors, customers, prospects, individuals, and employees greater power over data and deprives organizations of the power to collect data for financial gain.

The pandemic did prove to be a blessing in disguise to the GDPR assessment tools market as

remote working asked for a higher degree of personal data protection.

Research states that close to 160K data-breach notifications have been received by the European authorities in the last 1.5 years since the execution of GDPR.

Future Market Insights has entailed these findings with future perspectives in its latest market study entitled 'GDPR Assessment Tools Market'. It has its team of analysts and consultants to look through an eagle's eye view in its primary, secondary, and tertiary modes of research.

"GDPR, in the EU, does govern citizens' privacy and also affects every organization that processes personal information from the EU citizens, irrespective of location. As per the regulation, non-compliant businesses do face exorbitant fines, which could amount to 4% of yearly global revenue.

#### Key Takeaways from GDPR Assessment Tools Market Report:

The organizations are under the likelihood of assessing their compliance with GDPR using various automated tools. These tools, using ML and AI, do identify as well as flag potential non-compliance issues in documents as well as other data sources.

Spanish data protection authority (known as AEPD), in September 2022, released a tool called 'Evalua Riesgo' for analyzing risk factors linked with personal data processing. As such, DPIAs (Data Protection Impact Assessments) could be conducted at a fast pace through it; and safeguards and measures could be suggested for mitigating residual risks, thereby letting organizations assess the intrinsic risks concerned with data processing activities in a non-exhaustive, preliminary manner.
