## Definition:

A Ballistic Analysis System, often referred to as a Ballistic Identification System, is a forensic technology used by law enforcement agencies and forensic experts to analyze and compare

ballistic evidence, particularly firearms-related evidence, in criminal investigations. The primary purpose of a Ballistic Analysis System is to link firearms, bullets, and cartridge cases to specific firearms and potentially connect them to specific criminal incidents or individuals.

#### Market Trends:

The integration of artificial intelligence (AI) and machine learning technologies into ballistic analysis systems was on the rise. These technologies were being used to automate the comparison of ballistic evidence and improve the accuracy and efficiency of firearm identification.

#### Market Drivers:

Increased incidents of gun-related violence and criminal activities, both domestically and internationally, have heightened the demand for effective tools and technologies to investigate and solve firearm-related crimes.
