Definition:

Eco fibres also called as Eco-friendly Fibers or natural

fibres. Eco fibres are naturally resistant to most of the fungi. These types of fibers are made up by using protein fiber and cellulose that is obtained from animal skin plants. Additionally,

Eco Fibres Market

manmade fibers can be regenerated as the fibers are made up by using the building blocks provided by nature. Many fiber manufacturers have been started manufacturing eco friendly fibers due to revolution regarding usage of sustainable products and green movement in the textiles industry. Moreover, this promotes safe work environment and better livelihoods as nature fiber cannot create pollution, improves soil quality and creates very less air pollution.

Market Trends:

High Adoption of Green Revolution among Manufacturers

Market Drivers:

Rising Awareness about Environmental Sustainability

Rising demand from Developing Economies

Market Opportunities:

Rising Research and Development Activities Lead to Innovation in Low Cost Production Techniques

Target Audience:

New Entrants/Investors, Fashion, Packaging, Healthcare, Analysts and Strategic Business Planners, Venture and Capitalist, Government Research Organizations, Private Research Organization, Government Bodies, End-Users, Others
