The change from pet ownership to parenting has been a very vital and defining trend in the automatic dog feeder market, specifically in developed countries. One-third of the households in the developed countries has a pet, where dog or a cat pet ownership have the dominance. Traditionally, pet owners used to feed their pets from the leftover family meals. However, owing to the growing awareness regarding importance of right dog's food which are manufactured with the focus to improve health of these animals and right feeding duration, has let to rise in demand for automatic feeders in the market. According to the inhouse survey, the expenditure

on pets have been increased by 1.5X as compared to last decade. The majority of the expenditure is related to pet food however, the accessories segment have gained high traction in the last five years. Smart connected pet collars, automatic dog feeders, pet furniture and pet toys have altogether grown immensely in the last few years along with various automatic dog feeder market trends.

However, recent years have seen preference towards adoption of cats as compared to dogs. There are multiple reasons responsible for resistance in dog adoption some among them are, high maintenance cost of dogs, frequent outdoor walks, incessant barking of dogs to name few. On the contrary cats are relatively quieter, prefers to stay indoors and have relative less expenses. Furthermore, scientific evidence suggest that playing with cats can calm nervous system and aids in lowering of blood pressure. IN addition there are also other health benefits associated with cats thus resulting in its increased adoption. These factors collectively restrict the automatic dog feeder market growth.
