

# Utility Global to Present at ADIPEC 2023

*Zero-electricity hydrogen production from waste gases to be center stage with technical presentation*

HOUSTON, TX, UNITED STATES,  
September 25, 2023 /

EINPresswire.com/ -- [Utility Global](https://www.utilityglobal.com), the

only decarbonization technology company pioneering the eXERO™ technology platform optimized for hard-to-abate industry sectors, today announced the company will present at the upcoming ADIPEC in Abu Dhabi, UAE. DeLome Fair, vice president of engineering for Utility Global, will present “Producing Hydrogen from Waste Gas” at 10AM on October 3, 2023 in the Manufacturing Technical Theatre Hall 16 of the Abu Dhabi National Exhibition Centre.

The technical presentation will detail the function and testing of a zero-electricity electrolytic reactor developed to produce high purity hydrogen from waste gases which has the potential to drive industrial transformation to net zero. It will cover the science and technology of the reactor, describing how it utilizes a unique solid oxide approach and other innovative design principles to enable economic hydrogen production from waste gas without external electricity. It will also cover key results of the test pilot, providing real-world data from detailed analytical assessments.

“ADIPEC is bringing together the best minds in energy and industrial manufacturing with the greatest technological advancements,” stated Fair. “We aim to show that rethinking decarbonization and producing clean hydrogen with a technology built for the energy transition offers industrial manufacturers a viable and near-term solution to both environmental and business challenges.”
