

BizCloud Experts advisory expands expertise on helping customers to Migrate to AWS Cloud

LEWISVILLE, TX, USA, September 22, 2023 /EINPresswire.com/ -- In today's digital era, businesses need to constantly adapt and evolve in order to stay competitive. One of the key drivers of this evolution is cloud computing, which provides a scalable and cost-effective solution for businesses of all sizes. AWS (Amazon Web Services) is a leading provider in the cloud computing space, offering a wide range of services and features to help businesses transform and innovate.

[Cloud Migration](#) refers to the process of moving an organization's workloads and applications from on-premises infrastructure to the AWS cloud. This migration is necessary for businesses that want to leverage the benefits of the cloud, such as increased agility, scalability, reliability, and security. When deciding to migrate to AWS cloud, it's important to choose the right migration strategy that aligns with your business objectives and requirements. Below are the six types of [AWS migration](#) strategies to consider:

1. **Re-Hosting (lift and shift):** This strategy involves moving applications from on-premises to the AWS cloud without making any changes to the architecture or code. It is a quick and low-risk approach for businesses looking to migrate their infrastructure to AWS rapidly.
2. **Re-Platforming:** With this strategy, businesses make minimal changes to their applications and infrastructure during the migration process. They take advantage of AWS services and features to optimize the application's performance, scalability, and cost efficiency. This strategy offers a balance between speed and optimization.

The graphic is a promotional poster for BizCloud Experts. At the top, it features the company logo 'BIZCLOUD EXPERTS' in blue and white, with a blue and white checkered icon to the left. Below the logo, the text 'ARCHITECTURE & ADVISORY SERVICES' is written in a bold, serif font, with a small orange ampersand between the words. A yellow banner with the text 'WE PROVIDE' in green capital letters is positioned below the main title. To the left of this banner, a list of services is provided in black capital letters: 'INFRASTRUCTURE ASSESSMENT', 'ARCHITECTURE DESIGN', 'MIGRATION TO CLOUD', 'SCALABLE AND COST-OPTIMIZED SOLUTIONS', and 'ALIGNED TO DEVOPS BEST PRACTICES'. To the right of the list, there is an illustration of a person with dark hair, wearing a yellow long-sleeved shirt, purple pants, and yellow shoes, sitting on a white surface and working on a laptop. Behind the person is a large screen displaying a code editor with blue and white text. To the right of the screen is a stack of five blue server racks. Above the server racks is a yellow cloud icon with two white arrows pointing up and down. At the bottom of the graphic, a yellow banner with the text 'Contact Us Now!' in green capital letters is displayed. Below this banner, the website 'www.bizcloudexperts.com' and the phone number '+1(214) 206-8976' are listed in black text.

ARCHITECTURE & ADVISORY SERVICES

WE PROVIDE

- INFRASTRUCTURE ASSESSMENT
- ARCHITECTURE DESIGN
- MIGRATION TO CLOUD
- SCALABLE AND COST-OPTIMIZED SOLUTIONS
- ALIGNED TO DEVOPS BEST PRACTICES

3. Re-Purchasing: Sometimes, it makes sense to replace existing applications with commercially available software or SaaS (Software as a Service) offerings available on the AWS Marketplace. This allows businesses to gain access to new features and reduce maintenance costs.

4. Re-Factoring (re-architecting): This strategy involves reimagining and redesigning applications to leverage cloud-native capabilities and services. It requires significant changes to the application's architecture and code but results in improved scalability, performance, and cost effectiveness.

5. Retiring: Businesses may have legacy applications that are no longer necessary or relevant. Retiring these applications during migration can help streamline operations and reduce costs.

6. Retaining (revisit later): In some cases, businesses may decide to delay the migration of certain applications to AWS, either due to complexity, cost, or other priorities. This strategy involves revisiting those applications at a later stage and determining the best approach for migration.

Migrating to AWS can be a complex and challenging process, especially for businesses without prior experience in cloud migration. That's where BizCloud

Experts comes in with a team of certified AWS experts who specialize in helping businesses successfully migrate to AWS while minimizing disruption and maximizing the benefits. With global presence in India and USA, BizCloud Experts can not only help migrate your workloads but also do it cost efficiently.

Advanced Consulting Partner

Solution Provider

MIGRATE YOUR APPLICATIONS & LEGACY
INFRASTRUCTURE TO **aws** CLOUD

www.bizcloudexperts.com

To ensure a smooth migration experience, BizCloud Experts offers a free discovery assessment for your business/current infrastructure, applications, and business requirements to provide you with a comprehensive understanding of the migration process and the optimal strategy to adopt. This paves the way to making informed decisions and planning your migration journey with confidence.

Schedule a demo with BizCloud Experts today and take the first step towards a successful AWS migration. As a leading solution provider helping SMB to enterprise level customers with designing/executing their Migration strategies, BizCloud Experts continues to empower organizations in their digital transformation journey, ensuring successful adoption of Migration best practices, streamlined processes, and ultimately, business growth.
