

Siletz Comm Health Clinic Recognized Nationwide for its Fentanyl Abuse Assistance Program in Major PSA Campaign

Fentanyl is a synthetic opioid that is 50-100 times more potent than morphine. An amount the size of one crystal of salt can be lethal.

NEW YORK, NEW YORK, US, September 25, 2023 /EINPresswire.com/ -- [Siletz Community Health Clinic](#), a leading healthcare provider in Lincoln County, Oregon, is proud to announce its participation in a major national Public Service Campaign produced by [World Impact Productions](#) and a team of Film & Television's elite Writers and Producers. The campaign aims to address the critical issue of Fentanyl abuse, offering support and assistance to individuals struggling with this deadly epidemic.

The campaign, which was distributed via major national television networks such as CNN, Fox News, MSNBC, and the major broadcast networks, reached tens of millions of viewers across the country. Additionally, it had a massive online presence, appearing on high-profile websites that cater to the target demographic, as well as appearing on platforms like Tik Tok, FaceBook and InstaGram.

Siletz Community Health Clinic played a vital role in the campaign as a

Over 100,000 Americans died from Fentanyl in 2022

featured resource for those seeking assistance with Fentanyl abuse. The gripping 60 second PSA shows both the dark side of fentanyl abuse and the hope and change that is still available to those who seek it. The clinic's comprehensive services and programs have made it that beacon of hope for individuals and families grappling with this public health crisis.

Fentanyl is cut into many recreational drugs without the user knowing

Siletz Community Health Clinic offers a wide range of services and programs aimed at addressing substance abuse and addiction, including Fentanyl. Their experienced healthcare professionals provide:

- * Counseling and Support: The clinic offers confidential counseling and support services to individuals and families affected by Fentanyl abuse.
- * Medication-Assisted Treatment (MAT): MAT programs are available to help patients safely withdraw from Fentanyl and other opioids under medical supervision.
- * Education and Awareness: Siletz Community Health Clinic is committed to raising awareness about the dangers of Fentanyl and providing resources for prevention.
- * Community Outreach: The clinic actively engages with the community through outreach programs, workshops, and educational events.

The inclusion of Siletz Community Health Clinic in the national campaign serves as recognition of its dedication to combating the Fentanyl crisis and providing essential support to those in need, particularly among the Indigenous Community, who are disproportionately affected by this scourge.
